

Is your organization ready for flu season?

This year, let CVS Pharmacy® support your vaccination needs.*

Our vaccination offerings include:

Advanced Scheduler

- Early access to in-store vaccine scheduling
- Can be combined with the Vaccine Voucher program
- Great option if on-site clinic requirements cannot be met

Vaccine Vouchers

- Redeemable at our 9,000+ pharmacy locations nationwide
- Organizations are invoiced directly for participant vaccinations
- No minimum number of participants

On-site vaccine clinics

- Added convenience and accessibility
- Insurance, voucher or hybrid billing options available
- Minimum number of participants required

*Vaccines available when certified immunizer is on duty. Age restrictions apply. Eligible patients will not pay any copayments unless required by their plan, including Medicare Part B.

**Centers for Disease Control and Prevention. Expanded NIOSH seasonal influenza web page provides easy access to guidance, highlights research. Available at: <https://www.cdc.gov/niosh/updates/upd-03-17-11.html>. Accessed Apr. 7, 2022.

†Centers for Disease Control and Prevention. Vaccine effectiveness: How well do the flu vaccines work? Available at: <https://www.cdc.gov/flu/vaccines-work/vaccineeffect.htm>. Accessed Apr. 7, 2022.

Here's why a flu vaccine program is good business:

111 million
U.S. workdays lost annually (2011) to flu.**

Estimated 7.5 million
flu illnesses prevented by the flu vaccine during 2019–2020 flu season.†

Up to 40% to 60% reduction
in the risk of flu illness among the overall population following flu vaccination.†
